VERSION 1

It is a short but sweet game.

It shows a lot of potential as a full on series, it just needs to be expanded upon.

More abilities or power ups would be a great edition.

Try it!

. These are the type of indie projects I want to see more of on steam, no half baked stuff, all of this game seems to be wholly made by Floofs, it seems it was made GameMaker and as someone who dabbles in it myself I can say that this is a project that had a good deal of effort put in, it's pretty good and I'd say get it if you can

-Pro's

Platforming controls well

Music is very happy with a chirpy style

The lives system is more of a nod to older lives system and the challenge of the game is mostly consistent and fair

The game has an overall feel of charm and passion about it that is lovely to play through

-Cons

there is some noticeable sprite misshaps

the difficulty can be a bit too hard at times

. A fun, albeit short, game for what it is. The platforming controls well, the music is nice, and there is a certain charm that comes with the nod to older game mechanics. I'd honestly recommend using a controller with this game.

Definitely worth checking out if you're in the market for a short game.. I had fun playing this. It's a tad short (I beat it in just 30 minutes), but I felt good playing it because I wanted to support the dev and the game is pretty darn fun enough as it is. Plus, it reminded me of those old-school Game Boy Color games, which is always a great thing. Definitely worth checking out if you like furries and old-school games! <3. Incredibly short but was kind of worth it for what it was. Would honestly suggest this if it ever has a sale price.

I'll give the dev some credit, at least he/she made it clear this is their first game. I will say this could use a remake should the dev get better at making games.
